

Protect yourself from ATM theft

- * Use ATM machines located inside banks rather than on the street.
- * Use the same ATM machine for your transactions. You should become familiar with the machine so that you can recognize changes to the machine.
- * Never use an ATM machine when other people are in the vicinity.
- * If you are using an unfamiliar ATM machine, especially one that is not inside a bank, examine it carefully. Look for 'extra' cameras and other devices - card or cash trapping devices.
- * Cover your ATM password with your hand.
- * Never rely on the help of strangers to retrieve a confiscated card.
- * Report to the bank for confiscated cards immediately before leaving the machine.
- * Do not use ATM machines with warnings posted on the machine.
